

MITFA OFFICIAL GUIDE

Artificial Intelligence for Artists

Presented by Matriculate in the Fine Arts

A Letter to the Artist

At Matriculate in the Fine Arts, we believe that art does not fade with time—it deepens.

Now, a new tool stands beside you.

Artificial Intelligence is not here to replace your creativity.

It is here to **support it, shape it, and carry it further into the world.**

This guide is designed to help you use AI not as a machine, but as a **creative partner.**

SECTION I — Understanding AI as an Artistic Tool

AI is best understood as:

- A **thinking assistant**
- A **writing partner**
- A **creative catalyst**
- A **business strategist**

👉 It does not create your vision.

👉 It helps you express it more clearly and more widely.

SECTION II — Getting Started (Your First Step)

The Golden Rule: Be Clear

Instead of saying:

“Help me with my art”

Say:

“Write a professional artist statement about my work exploring aging, memory, and color for a gallery audience.”

What to Always Include

- Your **theme**
- Your **audience**
- Your **goal**
- Your **tone**

👉 The clearer you are, the stronger the result.

SECTION III — Essential Uses for MITFA Artists

1. Artist Statements That Resonate

AI helps you articulate what you already feel.

Use it to:

- Refine your message
 - Add clarity and depth
 - Adjust tone for different audiences
-

2. Grant Writing & Funding Success

Funding fuels artistic freedom.

AI can help you:

- Structure proposals
- Strengthen language
- Demonstrate impact

Example Prompt:

“Write a compelling grant proposal for a senior artist creating community-based visual art.”

3. Promotion & Visibility

Your work deserves to be seen.

AI helps create:

- Social media posts
- Email announcements
- Exhibition descriptions
- Press releases

👉 Visibility is not vanity—it is survival.

4. Exhibition Planning

Think like a curator.

Use AI to:

- Develop exhibition themes
 - Write gallery text
 - Plan event flow
-

5. Selling Your Work

AI helps you communicate value.

Create:

- Artwork descriptions
 - Pricing strategies
 - Collector-focused narratives
-

6. Overcoming Creative Blocks

When inspiration pauses, AI prompts you forward.

Ask:

“Give me 10 new artistic ideas based on themes of legacy and transformation.”

7. Learning New Skills

You are never “too late” to learn.

AI can teach:

- Website creation
 - Digital marketing
 - Online sales platforms
 - Presentation skills
-

SECTION IV — The MITFA Workflow

Step 1: Create

Your original work comes first.

Step 2: Describe

Use AI to explain your work.

Step 3: Expand

Turn one piece into multiple opportunities.

Step 4: Share

Promote across platforms.

Step 5: Sustain

Use AI to plan income and growth.

👉 This is how art becomes a **living practice**.

SECTION V — Advanced Techniques

A. Role-Based Prompting

Tell AI who it should be:

- “Act as a gallery curator”

- “Act as a grant reviewer”
- “Act as an art collector”

👉 You gain professional insight instantly.

B. Iteration (Refinement)

Never stop at the first result.

Say:

- “Make it more elegant”
 - “Make it more emotional”
 - “Shorten and strengthen”
-

C. Combining Outputs

Ask:

“Merge the strongest parts of these versions into one powerful final draft.”

SECTION VI — What to Avoid

- ✗ Letting AI replace your voice
- ✗ Accepting the first draft
- ✗ Being too vague
- ✗ Ignoring your audience

👉 Remember: AI is your assistant—not your identity.

SECTION VII — Ethics & Integrity

At Matriculate in the Fine Arts, we value:

- Authenticity
- Originality
- Respect for artistic ownership

Use AI responsibly:

- Do not present AI-generated work as fully original without transformation
 - Always maintain your creative fingerprint
-

SECTION VIII — Your Growth as an Artist

AI allows you to:

- Move faster
- Communicate better
- Compete stronger
- Reach wider audiences

But the heart of the work remains:

- 👉 Your story
 - 👉 Your vision
 - 👉 Your lived experience
-

FINAL WORD

At Matriculate in the Fine Arts, we are committed to helping artists not only create—but **thrive**.

Artificial Intelligence is one of the tools that can help you do just that.

Use it wisely.

Use it boldly.

Use it in service of your art.

Your art is the voice.

AI is the microphone.
